TITLE INDEX

Alkylation and aralkylation of N-heterocycles, IV (Reddy and Rao), 141.

Bessel polynomials, a note on the (Soni), 93.

Chromic acid oxidation of alipthatic secondary alcohols—substituent effects and the mechanism (Venkatasubramanian and Srinivasan), 1.

Cu_2Cl_2 and Cu_2Br_2, growth of, on single crystal faces and polycrystalline copper during dissolution in $CuSO_4 + H_2SO_4$ (Nageswar and Setty), 282.

Differential equations, second order non-linear ordinary, and application to heat transfer problem, numerical procedure for (Tikekar and Swarnalata Prabhu), 288.

Double dispersion relations in quantum statistical mechanics—II (Rajagopal and Cohen), 149.

Electron paramagnetic resonance of Cu^{2+} ion in CsCl single crystals (Banerjee and others), 49.

Ester hydrolysis, conformational studies in (Radhakrishnamurti and Patra), 181.

Flow, hydromagnetic, near an accelerated plate with suction (Vidyanidhi and Rao), 298.

Flow, self-similar, into a cavity, instability of (Tagore and Prasad), 219.

Flow, steady laminar, with suction or injection and heat transfer through porous type (Tikekar), 56.

Force constants and mean amplitudes for some anions of Mx_6 type (X = F, Cl, Br) (Rao and others), 42.

Gamma-ray, low energy, spectrum in space (Anand and others), 225.

Hypernuclei, decay of, the spin dependence of $\wedge$ N weak interaction in (Rao and others), 101.

Hypernuclei, light, decay of, final state interactions in (Rao and others), 257.

Hypernuclei resonant states $\wedge Li^6$, $\wedge He^5$ and $\wedge Be^9$ (Rao and others), 32.

Integral, contour, involving Legendre polynomial and Meijer's G-function (Bajpai), 209.

Integral transform, some applications of (Nebb), 16.

Integration, fractional, and $\omega_{\mu\nu}$-transform (Joshi), 230.

Li + d nuclear reaction (Saxena), 9.

Nuclear interactions, high energy, energy transfer to neutral pions in (Gopalakrishnan), 242.

Numbers, large, on weak laws of (Govindarajulu), 266.

Oxidation studies, VIII (Padma and Santappa), 189.

Rotational analysis of the $C\,^2\Sigma^+$–$X\,^2\Sigma^+$ system of AlO (Singh), 82.

Rotational analysis of the $^1\Pi - X\,^1\Sigma$ system of AsN (Dixit and others), 23.

Saalschützian ${}_{2\rho+3}F_{2\rho+2}$ (1), sum of (Jain), 215.

Shock waves, turbulent, in a collision-free plasma (Viswanathan and Dwarakanath), 119.

Solution, an exact similarity, in radiation-gas-dynamics (Ashraf and Sachdev), 275.

Thermoelastic stresses in an anisotropic slab (Singh and Singh), 167.

U^{234}/U^{238} activity ratios in South Pacific Ocean waters (Krishnaswamy and others), 238.

Uranyl ion, some organic complexes of, spectral studies on, II (Sanwal and Pant), 201.

Vinyl polymerization, IX (Saccubai and Santappa), 111.

X-rays from Scorpio X-1 and Taurus X-1 (Crab), ionospheric effects of (Ananthakrishnan and others), 69.
